Home Visit (CP@home)

Implemented In

Canada

Australia

and expanding...

Future outlook

CP@clinic has the potential to become the **standardized wellness clinic model** across Canada and internationally

Evidence-Based

Multi-site, pragmatic, community-based cluster randomized controlled trial

Significantly improved participant health & quality of life (Icon: hands holding hearts)

20% reduction in EMS calls (Icon: ambulance with downward arrow)

Economic evaluation

Every \$1 spent on the CP@clinic Program saves the emergency care system \$2 (Icon: piggy bank)

Key Take-away

CP@clinic **addresses** patient and healthcare system **needs** while **saving money** for the emergency care system (Icon: hand pointing)

A Unique Program

Guided database with decision support

Standardized paramedic training

Easily adaptable to different settings

Facilitates interprofessional care

Serves vulnerable, underserved populations
